

Healthcare organizations face a myriad of issues driven by government regulation, economic uncertainty, and an industry in a continual state of flux.

We have over 35 years of experience and proven success in resolving administrative, management, and operational challenges for medical providers, insurance, and healthcare companies. Our unique combination of industry knowledge and practical expertise allows us to partner with clients to successfully address their business challenges.

We provide a full spectrum of services including:

- Strategic Advisory Services
- Due Diligence and Transaction Assistance
- Interim Management
- Program Management

Our clients are decision makers at healthcare organizations, government agencies, investment firms, strategy consultancies, and non-profits. At JE Consulting, **we offer a full range of services:**

Strategic Advisory Services

Operational Consulting
Interoperability and Clinical Data Exchange
Revenue Cycle Management
Vendor Management
Strategic Partnering
Due Diligence
HIPAA Transactions and Compliance

Due Diligence and Transaction Assistance

Healthcare mergers, acquisitions, and other forms of partnerships are occurring in record numbers. Many organizations are not equipped to navigate this rapidly changing industry.

We work with a variety of organizations ranging from private equity firms, banks, venture capitalists and other companies seeking both pre-merger and acquisition due diligence and post-acquisition integration assistance. We can serve in an advisory role or perform detailed due diligence based on the unique circumstances of the transaction.

Program Management

Many healthcare organizations are tackling large, complex efforts that combine the delivery of new systems or enhancements, new and changing business models, and changes to organizational structure and capabilities.

Program management is more complex than simply managing a collection of projects. Programs often involve fundamental business change and expenditures with significant bottom-line impact. We provide program governance, oversight, and control in accordance with the mission and goals of the organization.

Interim Management

We function as an adjunct member of the client's staff on an interim basis. Whether assisting an investment firm during a transition or supporting a client managing organizational change, we do more than just keep the operation steady – we offer insightful guidance and expertise.
